

Riva AR is a simple, easy-to-use alternative to spreadsheets and custom databases for organizations wanting to record and track asset inventories. It only takes moments in Riva AR to set up an asset type with the attributes you need. It's spreadsheet importer pulls data directly into the inventory, without needing to rekey anything. Riva AR provides powerful enterprise-level security so that you can precisely control what each user can view and edit.

Riva AR integrates seamlessly into [Riva EI](#) to fill all the gaps in an organization's asset inventory.
